COMMERCIAL AIRPLANES

The MHI Group supplies the world's leading aircraft manufacturers — Boeing, Bombardier, and Airbus — with major components of commercial airplanes, including the fuselage, main wings, doors and more. As a Tier 1 commercial aircraft production partner that directly supplies components, the Group is proud of its world-class scope of operations and technological expertise. Looking ahead, the MHI Group intends to enhance productivity by integrating production from components manufacturing to structural assembly, employing highly reliable technology to ensure comfortable air travel for people around the world.
