

Engineers, Be Ambitious!

Application & Planning Team, Turbocharger Section,
Engineering Department, Marine Machinery Division,
Mitsubishi Heavy Industries
Marine Machinery & Engine Co., Ltd.

Haruna Ono

Since becoming an engineer two years ago, Ono has been actively involved with turbochargers* from development planning through to the delivery. Enthusiastic, keen to learn, and a good listener, every day she assesses customer and coworker opinions and incorporates them into the designs; every bit of information gleaned in this manner leads to the next design development.
