Diamond WTG Engineering & Services, Inc. Secures Long Term Maintenance & Services Agreement for Century and Intrepid Wind Farms

Contract underscores Diamond's expertise in supporting the nation's wind industry as a leading Independent Service Provider.

(Newport Beach, CA – May 31, 2016) Diamond WTG Engineering & Services, Inc., a group company of Mitsubishi Heavy Industries, Inc., has signed a five-year agreement with MidAmerican Energy Company to provide state-of-the-art service support for the 50 units of one megawatt (MWT-1000A) wind turbines at MidAmerican's Century and Intrepid Wind Projects, in Hamilton and Buena Vista Counties, Iowa.

Mr. Harm Toren, President and CEO of Diamond, stated, "We are honored to have been selected by MidAmerican Energy Company as their preferred Independent Service Provider (ISP) to ensure this energy complex operates at maximum efficiency. It is also a reflection of our commitment to set the industry's standard of excellence in providing 24/7 support to a generation of renewable energy facilities crucial to America's future."

Mr. Toren continued, "During 2016, we expect to continue to expand our portfolio of ISP customers as we demonstrate a multidisciplined approach to addressing the needs of owners that share our vision in how wind turbine technology can power our nation while contributing to environmental protection."

As part of the Mitsubishi family, Diamond brings to customers a unique combination of industry experience, engineering, research and development, proven project management, and execution capabilities.

"As an industry leader in owning and operating wind generation, we look forward to working with Diamond to optimize the performance of our fleet at our Century and Intrepid wind farms," said Mike Gehringer, vice president, renewable energy for MidAmerican Energy Company.
