FD High Performance Air-Conditioning *series*

The PAC range from Mitsubishi Heavy Industries Thermal Systems is ideal for air-conditioning in offices, shops, restaurants, and bars, as well as other commercial environments. The versatility of the PAC range, offers you a wide selection of models in function of your installation needs. The modern and attractive design of our indoor units is harmoniously integrated into any atmosphere creating a pleasant and relaxing environment.

New Generation

Ceiling Cassette
4way

FDT

- Automatic energy saving control
- Keep maximum comfort with minimal draft
- Quiet operation

High energy efficiency with new technology

FDT can achieve higher seasonal efficiency by utilising Mitsubishi Heavy Industries latest technology.

● SEER and SCOP is defined in European regulations. Please refer to P112.

SEER in cooling ■ Previous(VG(R410A)) ■ New(VH(R32))

SCOP in heating ■ Previous(VG(R410A)) ■ New(VH(R32))

Quieter noise & Improved aerodynamic performance of the unit

New technology achieved low noise while keeping capacity and comfort by reducing the pressure fluctuation in an indoor unit. A fan guard ensures both safety and quietness.

Turbo fan

Fan guard (standard equipment)

Various panels available

You can choose white and black panel according to the atmosphere and purpose of the room.

White panel (Fine snow)

Black panel (Shadow black)

New flexible flap control for draft prevention

Draft Prevention Panel (Option)

Each of the 4 flaps can be controlled individually at each operation mode. They change air flow direction and prevent drafts occurring. This function also provides flexible control of air flow direction.

Motion Sensor (Option)

Motion sensor (option) detects human activity. Energy saving control is achieved by shifting set temperature according to detected amount of activity.

Ceiling Cassette
4way compact

FDTC

- More comfort and Higher energy savings
- European design
- Lower noise

A' Design Award and Competition is the World's largest, most prestigious and influential design accolade, the highest achievement in design. A' Design Award Winner Logo, symbolizes exceptional design excellence in products, projects and services.

European Design & Flat Panel

Various panels available

You can choose the grill design according to the atmosphere and purpose of the room.

Integrated Ceiling System Design(600×600)

Draft Prevention Panel and Motion Sensor (Option)

Draft prevention panel and motion sensor are available on FDTC, just like on FDT.

Floor
standing

FDF

- New floor standing unit compatible with R32
- Increased Energy efficiency
- R32 leak detector built-in

Improved features

Heat exchanger design optimized for R32 operation. The leak detector device will be integrated at the bottom of the unit. Remote control upgraded for leak detector functions.

Draft Prevention

Keep maximum comfort with minimal draft: FDT & FDTC control flaps with more flexibility.

Ceiling cassette Compact FDTC

Ceiling cassette FDT

Draft Prevention Panel off

Draft Prevention Panel working *

Draft Prevention Panel provides a comfortable airflow without any draft feeling. Whether cooling or heating a room, the remote control can be used to instantly suppress any warm or cool drafts. This accurately assists how air flow is directed out of the indoor unit.

* Images is for illustration purposes.

Motion Sensor

Energy saving operation by detecting human movement

3 Step Control

- 1 Power Control** Motion sensor (option) detects human activity. Energy saving control is achieved by shifting set temperature according to detected amount of activity.
- 2 Stand by** Unit will go on stand-by mode when no activity is detected. When the motion sensor detects activity again, the unit will automatically re-start operation.
- 3 Auto Off** Unit will go off automatically when no activity is detected for 12 hours.

Optional for models

Operation mode and Control of Motion sensor		eco operation		Operation mode				
		comfort operation		Auto	Cool	Heat	Dry	Fan
Power Control *1	Human activity 	Low	Cooling +3°C Heating +3°C	+3°C	+3°C	+3°C	—	—
		High	Cooling -3°C Heating -3°C	-3°C	-3°C	-3°C	—	—
		None	Cooling +3°C Heating -3°C	+3°C	-3°C	-3°C	—	—
Auto Off *2				●	●	●	●	●

*1 Set temperature is revised maximum $\pm 3^{\circ}\text{C}$ at Cooling/Heating mode by detecting heat volume movement.
 *2 Absence for 1 hour \Rightarrow Operation stops ("Stand-by") 12 hours absence \Rightarrow Operation stops completely

New!

Stylish Remote Control

2025 Design Award

reddot winner 2025

The RC-ES1 Series has been honored with the prestigious Red Dot Design Award 2025 in the Product Design Category.

The RC-ES1 Series has been honored with the prestigious Gold A' Design Award in the Repair, Restoration, and Maintenance Products Design Category.

RC-ES1

- Stylish and sophisticated design
- Compact size (86×86mm)
- Remote control with Bluetooth® wireless technology

Optimized User Interface

The functions available on the remote have been minimized to focus on users' core needs, simplifying operation and avoiding overly complex settings. A wide range of functions, including service settings, remains accessible through the app.

You can control the air-conditioner by installing App on your smart phone

Search for "M-Air PRO" from the Google Play™ store for Android™ and App Store for iPhone.

Please check the app stores for the latest supported OS version information.

App Store and iPhone are registered trademarks of Apple Inc.

Google Play and the Google Play logo are trademarks of Google LLC.

Wireless connection

- Remote control with Bluetooth® wireless technology
- Easy set-up of indoor units
- Notifications of abnormal conditions or operational data from the remote control will be sent to your smartphone.

Information screen

By looking at the information screen, you can check the current operating conditions at a glance.

Central management by smart phone

You can select and change the settings of multiple rooms with only one action on your smartphone.*

Easy setup and management of up to 20 units via smartphone and tablets, up to 10 settings could be saved in the app.

Easy installation with the new casing structure

The casing is separated into the lower and the upper case. By inserting the upper case into the lower case embedded to the wall, the remote could be easily installed.

*The function would be available when the smartphone is connected to the remote control with Bluetooth® wireless technology.

Easy to instinctively operate with simplified icons

Remote Control

Simple use with advanced settings REMOTE CONTROL

RC-EX3D

Function Switch

The function switch allows the user to select preferred two functions that are desired from the seven available functions shown. These functions can be used by simply pressing the button after they are set, allowing you to use your preferable functions immediately.

1. Draft prevention ON/OFF

Anti draft can be turned ON/OFF with a single tap of the button.

2. High Power Mode

High Power Mode achieve excessive cooling / heating capacity in 15 minutes to quickly adjust the room temperature to a comfortable level.

3. Energy Saving Mode

Temperature is set to be optimized to save energy without losing comfort.

4. Quiet Mode

Outdoor unit starts to operate quietly by activating this mode. The time of this mode can be set in conjunction with Indoor Silent Timer.

5. Home Leave Mode

Home leave mode maintains the room temperature at a moderate level.

6. Favourite Mode

Operation mode, set temperature, fan speed and air flow direction will automatically be adjusted to the programmed favourite setting.

7. Filter Sign

Announces the due time for cleaning the air filter.

Draft Prevention Setting (only FDT•FDTC series)

User can enable/disable the motion of Draft prevention panel for each air outlet for each operation mode. This function can be set while operating.

Easy Adjustment of the Air Flow

User can visually confirm and set the direction of flaps using the visual display on the remote controller.

Motion Sensor Control

Presence of humans and activity are detected by a motion sensor to perform various controls.

1 Select Enable / Disable

Select **Enable** / **Disable** for the motion sensor of the indoor unit connected to the R/C.

Motion sensor control

Enable/Disable

2 Select Enable / Disable per control

- Power control
- Auto-off

Enable/Disable

Additional Functions of External Input / Output

The external input/output of indoor unit by remote controller can set input/output based on user's demand.

Remote surveillance system

Card key on-off

External Input

Two of the following could be selected

CNT, CNTA

- Input**
- Run / Stop
 - Permission/Prohibition
 - Cooling/Heating
 - Emergency Stop
 - Set temp. shift
 - Forced thermo-off
 - IU operation stop
 - Silent mode

External Output

Four of the following could be selected

CNT

- Output**
- Operation
 - Heating
 - Compressor ON (thermo-ON)
 - Inspection
 - Cooling (defrosting)
 - Fan operation
 - Fan operation with Phi or Hi
 - Fan operation with Me or Lo
 - Defrosting (oil return in heating operation)
 - Ventilation
 - Heater ON
 - Free cooling
 - IU overload alarm

Silent Mode Control

The Outdoor unit is controlled prioritising quiet operation. Silent mode control must be set to the F1 or F2 switch. User can start/stop the silent mode control with a single tap of a button.

Indoor Unit Capacity Display

Capacities of Indoor units connected to the RC-EX3D are displayed.

Language Switching

User can select from the following languages and also switch them on the top display.

Error display

“Error” If any error occurs on the air-conditioner, the “Unit protection stop” is indicated on the message display.

Outdoor units

Our new advanced technology has high efficiency, strong heating and long piping. This contributes to the environmental protection through energy saving and permits installation of the units (4–6HP) considering a heating operation under temperature conditions down to -20°C. The Standard Inverter series offer optimised efficiency at a reasonable cost.

High Efficiency

Outdoor units high efficiency levels are achieved thanks to our latest technologies, such as high efficient twin rotary compressors.

SEER in cooling

■ Previous(VG(R410A)) ■ New(VH(R32))

SCOP in heating

■ Previous(VG(R410A)) ■ New(VH(R32))

· In case of ceiling cassette 4way unit.

Our Latest Technologies

1 High efficiency performance on the DC twin rotary compressors

Adoption of DC twin rotary compressor has enabled to utilize a high-speed range of up to 120 rps at the maximum to secure the required capacity.

DC twin rotary compressor

2 Vector inverter control

Optimum compressor control has been realized by employing the vector control* and the starting current has been improved significantly compared with former models. Moreover, vibration has been reduced.

* Vector control means a technique to realize an optimum control by converting the current wave to a smooth sinusoidal waveform

Better partial load efficiency

Distributed winding motor

Centralized winding motor

* only R32 models

3 Heat exchanger

Thanks to changing fin configuration from flat sheet to M shape fin. This high dimensional structure provides optimum balance of heat transfer and airflow.

4 Blue fin

Due to application of blue coated fins (KS101) on the heat exchanger of the new outdoor unit, corrosion resistance has been improved compared to previous models.

Hyper Inverter	3-6HP
Micro Inverter	4-12HP
Standard Inverter	3.5-5HP

Outdoor units

Leading Powerful Heating Capacity

- The maximum heating capacity can be increased by:
- optimizing the refrigerant control and use of the electric expansion valve
 - Utilization of the twin rotary compressors
 - Nominal heating capacity can be reached when outdoor temperature is -8°C
 - Also effective to be used in cold areas

Hyper Inverter

Temperature of supply air can reach 40°C in 4 minutes after start up under low temperature operation conditions (at both indoor and outdoor temperature of 2°C) and can reach 50°C in 8 minutes after that.

Heating capacity (in case of 5HP, 3Phase 380V)

model name	nominal heating capacity (kW at outdoor temperature of 7°C)	heating capacity at outdoor temperature of -8°C
FDC100VSX(4HP, 3Phase 380V)	11.2kW	11.2kW
FDC125VSX(5HP, 3Phase 380V)	14.0kW	14.0kW
FDC140VSX(6HP, 3Phase 380V)	16.0kW	16.0kW

Please refer to our technical manual for installation conditions, operation range and heating/cooling capacities. (including 1Phase 220V)

Heating capacity

Wide Range of Operation

Our new advanced technology has expanded the heating and cooling operation range. This permits installation of the units under a low outdoor temperature conditions down to -15°C/-20°C in heating operation and -15°C in cooling operation.

Silent Mode Operation

Hyper / Micro Inverter

Improved "silent mode" is possible, in two steps. ※ Applied on 4-6HP, 8-12HP(R32)

Installation Workability

Enhanced installation workability thanks to the extended pipe length – longest level in the industry and precharged refrigerant.

Long piping (in case of Hyper Inverter 4–6HP (R32))

Wider variation of installation!

Hyper Inverter		
HP	Piping length	Height difference
1.5 – 2.5	30m	20m
3	50m	30m
4–6(R32)	100m	50m
4–6(R410A)	100m	30m

Micro Inverter		
HP	Piping length	Height difference
4 – 6	50m	50m ^{*2}
8–10(R32)	70m	50m ^{*3}
8-10(R410A)	70m	30m
12	60m	50m ^{*3}

Standard Inverter		
HP	Piping length	Height difference
3 ~ 5	30m	20m

Refrigerant precharged piping length extending to 30m

Refrigerant precharged piping length extends up to 30m*. This eliminates the need to add refrigerant on site, which sets it free from trouble of excessive or insufficient charging of refrigerant, and allows carrying out the installation smoothly. * Hyper inverter 1.5–2.5HP and Standard Inverter are up to 15m.

^{*2} When the outdoor unit is installed at a position higher than the indoor unit by 30m or more, set SW5-2 on the control PCB to ON.
^{*3} In case of following conditions: Max.50m(Outdoor unit is higher & Outdoor temperature ≤ 43°C), Max.30m(Outdoor unit is higher & Outdoor temperature > 43°C)

Serviceability

Micro Inverter (8(R32)-10-12HP)

Improved freedom of piping layout

Hole size becomes 120% bigger.

A transparent rain cover

Attached as a standard for easy maintenance.

Wire insertion holes for fall prevention

2 Layer Construction

Thanks to control box structure with 2 layer construction using hinge connection, service and maintenance has been made much easier for inverter components.

Fixing screws to service panel

Decreasing number of screws from 5 to 2, installation & service speed is improved.

Base heater kit (Option)

This kit is recommended to be used in an area where the lowest temperature drops below 0°C.

Choice of piping specification

Diagrams below show the application as samples. For further information, refer to TECHNICAL MANUAL.

Twin type

Models FDC71, FDC100-140, FDC200, FDC250, FDC280
[Branch pipe set : DIS-WA1G, DIS-WB1G]

Triple type

Model FDC140, FDC200
[Branch pipe set : DIS-TA1G, DIS-TB1G]

The indoor - outdoor piping length differences among indoor units are less than 3m.

Chart of shapes of branch piping parts

Branching pipe set type	Outdoor unit	Indoor unit combinations	Symbol

DIS-TA1G (Three-way branching set)	FDC140	50+50+50	 ID12.7 ID15.88	 ID9.52	 Joint A ID9.52 3 pieces Flare Joint (for indoor unit side connection)
 Joint B OD15.88 1 piece ID12.7	 Joint D ID12.7 1 piece OD9.52				

Symbol ① to ④ in the drawing shows the symbols of branch piping parts in the chart respectively.

Branch piping should always be arranged to have level or perpendicular position.

Notes

- (1) When 40-60 models of indoor units are applied to this combination, the reducer ③ supplied with the branch piping set should be used in order to reduce the liquid piping size from ø9.52mm to ø6.35mm at indoor unit side (flare connection). Accordingly be sure to select the liquid piping size ø9.52mm from branch to indoor unit.
- (2) The reducer ④ is for FDC71 and 100 models only.

ID stands for inner diameter and OD, outer diameter.

The branch piping (both gas and liquid lines) should always be arranged to have a level or perpendicular position.

2-Way Branch

Mount — sections level with the floor.

Mount — sections perpendicular to the floor.

3-Way Branch

Indoor units

BENEFITS SUMMARY

		FDT	FDTc	FDU	FDUM	SRK	FDE	FDF	
									
Energy-Saving 	 Inverter Technology Inverter control technology delivers high efficiency and a smooth operation from high speed to low speed. A smooth sine voltage wave is attained.	●	●	●	●	●	●	●	
	 Energy-Saving Operation * Since the capacity is controlled automatically based on the outdoor temperature, energy can be saved without losing comfort.	●	●	●	●	●	●	●	●
	 Motion Sensor * This sensor detects human activity and shifts the temperature setting according to the amount of activity in the room.	● Option	● Option	● Option	● Option		● Option	● Option	
	 Home Leave Operation This function ensures that when the room is unoccupied for long periods of time, the unit will maintain a moderate indoor temperature, avoiding extremely hot or cool temperatures.	●	●	●	●	●	●	●	●
	 Set Temperature Auto Return * This function allows the user to program a preferred set temperature that the unit will return to each time it is operated.	●	●	●	●	●	●	●	●
Comfort 	 Automatic Operation This function automatically selects the required heating or cooling function based on the current room conditions.	●	●	●	●	●	●	●	
	 Silent Operation This function allows the user to program periods where the unit will operate with reduced noise levels, perfect for night time and an uninterrupted sleep.	●	●	●	●	●	●	●	
	 Hi Power Operation Use the high power function to quickly reach your optimum temperature level when you first turn on the unit. This function will operate for a maximum of 15 minutes before returning to normal operation.	●	●	●	●	●	●	●	
Air Flow 	 Flap Control System This function allows the user to set the upper and lower limit positions of the flap at each air outlet individually, providing you with complete control over interior air flow.	●	●			●	●		
	 Auto Swing The louvers on your unit will move up and down continuously during operation. This function allows you to set the up/down swing position of the louver to the preferred operation angle.	●	●			●	●	●	
	 Draft Prevention Setting * Draft Prevention setting provides a comfortable air flow without any draft feeling. Whether cooling or heating a room, the remote control can be used to instantly suppress any warm or cool drafts. This accurately assists how air flow is directed out of the indoor unit.	● Option	● Option						
	 Automatic Fan Speed The unit's on-board microcomputer continuously monitors the room's air temperature and adjusts the air flow automatically.	●	●	●	●	●	●	●	

When using RC-EX3D (Remote control), functions with symbol  are available.

However, for RC-E5 (Remote control), functions with * are not available.

FDT	FDTC	FDU	FDUM	SRK	FDE	FDF

		FDT	FDTC	FDU	FDUM	SRK	FDE	FDF
Timer 	 Sleep Timer This function allows the user to set a pre-determined amount of time between 30 and 240 minutes that your unit will operate for before switching off.	●	●	●	●	●	●	●
	 Peak-Cut Timer * This function lets the user to preset the capacity limit during certain periods of the day, minimising energy consumption during peak billing times, thus reducing operation costs.	●	●	●	●	●	●	●
	 Weekly Timer Set the unit to turn on and off automatically on a weekly basis to suit your usual room usage on each day.	●	●	●	●	●	●	●
Convenience 	 Function Switch * From the seven available functions on the unit, this function allows the user to set two functions to operate automatically.	●	●	●	●	●	●	●
	 Favourite Setting * Operation mode, set temperature, fan speed and air flow direction automatically adjust to the programmed favourite setting.	●	●	●	●	●	●	●
	 Select the Language * Set the language to be displayed on the remote control.	●	●	●	●	●	●	●
	 Air Filter The air filter in the unit traps and removes airborne dust particles and other allergens to provide you clean air.	●	●	Procure locally	● Option	●	●	●
	 Filter Sign This warning alerts when the filter needs to be cleaned.	●	●	●	●	●	●	●
	 Outside Air Intake This function provides clean fresh air into the room through the external air intake, avoiding the constant recycling of internal air.	●	●	●	●			
	 Self Diagnostics The internal microcomputer automatically runs a diagnostic of the system in the event of a malfunction. This enables authorised dealers to isolate and repair any issues.	●	●	●	●	●	●	●
Others	 Built in Drain Pump The built-in drain pump, allows greater flexibility with installation, offering a great solution for applications with limited space.	●	●	● *1	●			
	 Improved Serviceability The fan unit (comprised of impeller and motor) is easily accessible from either the side or bottom of the unit and can be slid out for easy maintenance.			●	●			

*1 : Except 200 • 250 • 280

RC-ES1

Wireless

RCN-T-5BW-E2(White)
RCN-T-5BB-E2(Black)

*Not all functions available with all remote control options.

Draft Prevention Panel (Option)

This prevents cold/hot draft being blown directly on the user. It is possible to set Draft Prevention Panel for each air outlet.

User can position panels by using the remote controller only (RC-EX3D, Wireless kit) when Draft Prevention Panel is available.

Motion Sensor (Option)

Motion sensor is equipped in the corner of the panel and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

LB-T-5BW-E(White)
LB-T-5BB-E(Black)

Individual Flap Control System

According to room conditions, four directions of air flow can be controlled individually by utilizing the flap control system. Individual flap control is available even after installation.

Flap can swing within an upper and lower flap range position within can be selected with a wired remote control.

* The wireless remote control is not applicable to the Individual flap control system.

For person who is far from the indoor unit

For both persons who are feeling hot or cold

Can cool both the kitchen and the guests

Reduced Noise

New technology has achieved low noise (in cooling) while keeping capacity and comfort.

Panel Select Pattern (Option)

8 patterns of panel are available.

- ① Standard Panel only
- ①+③ Standard Panel with corner panel with motion sensor
- ①+④ Standard Panel with corner panel with wireless receiver
- ①+⑤ Standard Panel with corner panel with motion sensor & corner panel with wireless receiver
- ② Draft Prevention Panel only
- ②+③ Draft Prevention Panel with corner panel with motion sensor
- ②+④ Draft Prevention Panel with corner panel with wireless receiver
- ②+⑤ Draft Prevention Panel with corner panel with motion sensor & corner panel with wireless receiver

Installation position of Wireless kit and Motion sensor kit

*Wireless receiver and Motion sensor can be installed to the position as shown

Suitable for High ceilings

The Powerful blowout carries comfortable air flow to the floor even in high ceiling applications. It is ideal for high ceiling offices, stores, etc., with a wide, uniform air flow throughout the room.

850mm Drain Pump

Drain can be discharged upward by 850mm from the ceiling surface close to the indoor unit.

It allows a piping layout with a high degree of freedom depending on the installation location.

Easy and quick installation and maintenance

Serviceability & Workability

Quick positioning !

Indoor unit is easily positioned and installed

1 Adjustable easier positioning of unit by new slits. FDT

New shape of slit is suitable to install the unit with more flexibility, compatible with many kinds of suspending bolt pitch on site. Any rectangular or squared pitch of suspending bolts are available with this slit.

Compatible with both square or rectangular bolt pitch

2 New slit in panel allows easier installation on site. FDT FDT FDT

Flexible positioning is available, which helps adjusting the direction of panel accordingly to lines or pattern on the ceiling.

4 long slits are available.

Quick installation and maintenance

1 Easy access to component part for easy maintenance. FDT

1. The control box and bell mouth can be removed together.

2. Easy access to impeller and fan motor.

Remove

2 New shape of path of wiring. FDT

New shape of path gives easy wiring work for installation.

Easy wiring work

3 No need to remove screws to open the controller cover. FDT

It is possible to loose and slide open the cover without removing the screws. This prevents the cover from falling and causing damage on site.

No need to remove screws

4 Safer installation by stopper of washer FDT FDT FDT

When unit is installed with hook between washers, this stopper helps to install the unit safely, without adjusting washer.

Builder

Maintenance

FDT

FDTC

For smooth and easy working

Good help for installation and maintenance

1 Easy and flexible hook to remove the filter

FDT
FDTC

Hook of soft material helps to remove the filter without dust spreading.

Press the filter tab to the outside and remove the filter.

Soft material

2 Securely fix the corner lid by strap

FDT

The direction of the strap hook part has been changed from longitudinal to lateral. Furthermore, a barb has been added to the hook pin to prevent the strap from coming off.

After

Easy to hook but not easy to loose

3 Drain-up-lift increases up to 850 mm

FDT
FDTC

The drain can be lifted up to 850 mm from the ceiling surface.

	Previous	New
FDT	700	850
FDTC	600	850

4 New port to check drain water flow

FDT

A water supply port has been provided in the piping lid for easier testing of the drain water flow. (The port is usually sealed with a rubber cap.)

5 Re-use of packages during construction work

FDT
FDTC

Package material (carton) helps to protect the unit from unexpected welding spatter or dust on the new unit.

Spatter

6 More flexible outlet for ducting

FDT
FDTC

Both $\phi 125$ and $\phi 200$ (oval shaped) are available.

7 Easy check of drain pan

FDT
FDTC

Easy inspection of the condition of the drain pan is possible by removing only the corner lid.

Remove corner lid. Remove drain cap cover and check the condition. It is necessary to clean-up, firstly remove the rubber stopper to drain water out and secondly remove the drain cap.

NOTES:

The data are measured under the following conditions(ISO-T1, -H1).
 Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
 *1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
 *2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

Vertical height differences	Outdoor is higher/lower	m	Max.30 / Max.15	Max.50 / Max.15		
Outdoor operating temperature range	Cooling	°CDB	-15 to 50*2			
	Heating	°CWB	-20 to 20			
Panel			T-PSA-5BW-E, T-PSAE-5BW-E(White) / T-PSA-5BB-E, T-PSAE-5BB-E(Black)			
Air filter, Q'ty			Pocket plastic net x 1(Washable)			
Remote control (option)			Wired:RC-EX3D, RC-E5, RC-ES1 Wireless:RCN-T-5BW-E2, RCN-T-5BB-E2			

NOTES:

The data are measured under the following conditions(R32:ISO-T1,-H1 / R410A:ISO-T1).

Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

*2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

NOTES:

The data are measured under the following conditions(R32:ISO-T1,-H1 / R410A:ISO-T1).

Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

*2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

NOTES:

The data are measured under the following conditions(ISO-T1, -H1).

Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

*2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

NOTES:

The data are measured under the following conditions(R32:ISO-T1, -H1 / R410A:ISO-T1).

Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

*2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

European Design & Flat Panel

Unique Grille Design

A grille designed with a unique structure and a clean white panel that blends with the room.

Honeycomb type Grid type

Integrated ceiling system design (600x600)

The weight is 14kg
Height of thin panel and main body is 248mm allowing adequate spacing for installation.

Thin Panel
Unique Grille Design
Big Louver

Taking OA (Outside Air) into inside
Fresh air can be taken in without optional parts.
When the fresh air is insufficient, optional parts can be used.

OA Spacer TC-OAS-E2(Option)
Joint Duct TC-OAD-E(Option)

Indoor Unit FDTC
OA Spacer
300mm
Ceiling Surface Panel Joint Duct

Draft Prevention Panel (Option)

This prevents cold/hot draft being blown directly on the user. It is possible to set Draft Prevention Panel for each air outlet.

User can position panels by using the remote controller only (RC-EX3D, Wireless kit) when Draft Prevention Panel is available.

Motion Sensor (Option)

Motion sensor is equipped in the corner of the panel and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

LB-TC-5W-E

Individual Flap Control System

According to room temperature conditions, four directions of air flow can be controlled individually by following Flap control system. Individual flap control is available even after installation.

The flap can swing within the range of upper and lower flap position selected with wired remote control.

* The wireless remote control is not applicable to the Individual flap control system.

Quieter Operation

Adopting new turbo fan and improving new heat exchanger enables noise reduction.

850mm Drain Pump

Drain can be discharged upward by 850mm from the ceiling surface close to the indoor unit. It allows a piping layout with a high degree of freedom depending on the installation location.

Suitable for High ceilings

The Powerful blowout carries comfortable air flow to the floor even in high ceiling applications. It is ideal for high ceiling offices, stores, etc., with a wide, uniform air flow throughout the room.

Panel Select Pattern (Option)

8 patterns of panel are available.

①	Standard Panel only
①+③	Standard Panel with corner panel with motion sensor
①+④	Standard Panel with corner panel with wireless receiver
①+⑤	Standard Panel with corner panel with motion sensor & corner panel with wireless receiver
②	Draft Prevention Panel only
②+③	Draft Prevention Panel with corner panel with motion sensor
②+④	Draft Prevention Panel with corner panel with wireless receiver
②+⑤	Draft Prevention Panel with corner panel with motion sensor & corner panel with wireless receiver

Remote control (option)			Wired:RC-EX3D, RC-E5, RC-ES1 Wireless:RCN-TC-5AW-E3			

NOTES:

- The data are measured under the following conditions(ISO-T1, -H1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
- *1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
- *2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
- *3 : The values are for one indoor unit operation. (Multi system only)

Remote control (option)			Wired:RC-EX3D, RC-E5, RC-ES1 Wireless:RCN-TC-5AW-E3			

NOTES:

- The data are measured under the following conditions(R32 : ISO-T1, -H1 / R410A : ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)
*4 : In case of following conditions:Max.50m(Outdoor unit is higher & Outdoor temperature ≤ 43°C), Max.30m(Outdoor unit is higher & Outdoor temperature > 43°C)

The values are for simultaneous Multi operation.

FDU

Indoor Unit

Duct Connected -High Static pressure-

FDU 71/100/125/140

FDU 200/250/280

- Energy Saving
- Automatic Operation
- Silent Operation
- Hi Power
- Weekly/Sleep/Peak-Cut Timer
- Self-Diagnostics

Remote control (Option)

Wired			Wireless
RC-EX3D RC-EXZ3D	RC-E5	New! RC-ES1	RCN-KIT4-E2

*Not all functions available with all remote control options.

External Static Pressure (E.S.P.) Control

The External Static Pressure (E.S.P.) can be manually set on the wired remote controller. Indoor unit will control the fan speed to keep rated air flow volume at each fan speed setting. You can set required E.S.P. by wired remote controller, calculated with the set air flow rate and the pressure loss of the duct.

Range of external static pressure

10-200Pa

RC-E5

E.S.P. button

External Static Pressure (E.S.P.) can be set by E.S.P. button.

*Range of 80-150 Pa is set at ex-factory default.
Range of 10-200 Pa is available by setting SW8-4 switch on at site.

Motion Sensor (Option)

Motion sensor is equipped in the ceiling plane or wall plane and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

LB-KIT2

High Efficiency

Energy efficiency is improved by use of DC fan motor & high efficient heat exchanger.

Zoning system (Max 8 zones)

Effectively control temperatures of multiple rooms with one indoor duct unit.

Zone control function

(Available for FDU71-140 and FDUM40-60(*3))

1. These models have a zone control function that can control up to eight zones.
2. The damper of each zone can be opened or closed with the exclusive remote control (RC-EXZ3D).
3. Timer function to open/close the damper is also available.
4. The duct system should be designed so that air flow volume of common zone(*1) or spill zone(*2) is 50% of total air flow volume.

*1: Common zone; A zone in which a damper is not installed.
 *2: Spill zone; A zone in which a damper open automatically.
 *3: For the FDUM series, only 4 Zone (max) are available.

Example of 6 zones

- Notes :
1. Cannot control more than 8 zones.
 2. Procure relevant parts such as relay parts, dampers, ducts, and wirings locally.
 3. The E.S.P. to Zone 2-6 should be the same as that for Zone 1

Improvement of the Serviceability

Fan unit (impeller and motor) can be pulled out from the right side of the unit. Maintenance can be carried out from the right side or the bottom side of the unit.

Transparent Inspection Window

Dirt condition of the bottom of a drain pan can be checked through this transparent inspection window without removing drain pan.

Enhanced Installation Workability

850mm Drain Pump is mounted in FDU71/100/125/140. The indoor unit is completely hidden in the ceiling, so this is suitable for spaces with classy interior decoration.

NOTES:

<p>The data are measured under the following conditions(R32:ISO-T1, -H1 / R410A:ISO-T1). Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB. *1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions. *2 : External static pressure is changeable to be set by the remote control. MAX external static pressure is "High static pressure" setting. The values of sound pressure level become 5dB(A) higher at external static pressure of 200Pa. *3 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.</p>

NOTES:

- The data are measured under the following conditions(R32 : ISO-T1, -H1 / , R410A : ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : External static pressure is changeable to be set by the remote control. MAX external static pressure is "High static pressure" setting. The values of sound pressure level become 5dB(A) higher at external static pressure of 200Pa.
*3 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*4 : In case of following conditions:Max.50m(Outdoor unit is higher & Outdoor temperature ≤ 43°C), Max.30m(Outdoor unit is higher & Outdoor temperature > 43°C)

FDUM

Indoor Unit
Duct Connected
-Low/Middle Static pressure-

FDUM 40/50/60/71/100/125/140

Filter kit (Option)

UM-FL1EF : for 40, 50
 UM-FL2EF : for 60, 71
 UM-FL3EF : for 100, 125, 140
 external static pressure loss:5Pa

- Energy Saving
- Automatic Operation
- Silent Operation
- Hi Power
- Weekly/Sleep/Peak-Cut Timer
- Self-Diagnostics

Remote control (Option)

Wired			Wireless
RC-EX3D RC-EXZ3D	RC-E5	RC-ES1	RCN-KIT4-E2

*Not all functions available with all remote control options.

Thin Design

The height of all FDUM models is only 280mm.

FDUM100/125/140	FDUM40/50/60/71
70mm less	19mm less
H 350mm → H 280mm	H 299mm → H 280mm

Motion Sensor (Option)

Motion sensor is equipped in the ceiling plane or wall plane and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

LB-KIT2

Automatic External Static Pressure (E.S.P.) Control

Duct design was simplified.
 Using DC motor, the most optimum air flow volume can be achieved by this automatic control.
 Indoor unit will recognize external static pressure by itself automatically and keep rated air flow volume.

RC-E5

E.S.P. button

External Static Pressure (E.S.P.) can be set by E.S.P. button.

Setting No.	No.1	No.2	No.3	No.4	No.5	No.6	No.7	No.8	No.9	No.10
E.S.P.	10 Pa	20 Pa	30 Pa	40 Pa	50 Pa	60 Pa	70 Pa	80 Pa	90 Pa	100 Pa

Zoning system

Effectively control temperatures of multiple rooms with one indoor duct unit. (Please refer to P47)

Improvement of the Serviceability

Fan unit (impeller and motor) can be pulled out from the right side of the unit. Maintenance can be carried out from the right side or the bottom side of the unit.

Transparent Inspection Window

Dirt condition of the bottom of a drain pan can be checked through this transparent inspection window without removing drain pan. (Please refer to P48)

Enhanced Installation Workability

850mm Drain Pump is mounted in all models. The indoor unit is completely hidden in the ceiling, so this is suitable for spaces with classy interior decoration.

Remote control (option)			Wired:RC-EX3D, RC-E5, RC-ES1 Wireless:RCN-KIT4-E2		

NOTES:

The data are measured under the following conditions(ISO-T1, -H1).
 Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
 *1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
 *2 : External static pressure is changeable to be set by the remote control. MAX external static pressure is "High static pressure" setting. The values of sound pressure level become 5dB(A) higher at external static pressure of 100Pa.
 *3 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

Air filter (option)		°CDB		
Remote control (option)		-20 to 20		
		Filter kit : UM-FL3EF		
		Wired:RC-EX3D, RC-E5, RC-ES1 Wireless:RCN-KIT4-E2		

NOTES:

- The data are measured under the following conditions(ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
- *1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
- *2 : External static pressure is changeable to be set by the remote control. MAX external static pressure is "High static pressure" setting. The values of sound pressure level become 5dB(A) higher at external static pressure of 100Pa.
- *3 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
- *4 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

NOTES:

- The data are measured under the following conditions(ISO-T1, -H1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
- *1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
- *2 : External static pressure is changeable to be set by the remote control. MAX external static pressure is "High static pressure" setting. The values of sound pressure level become 5dB(A) higher at external static pressure of 100Pa.
- *3 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
- *4 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

NOTES:

<p>The data are measured under the following conditions(R32 : ISO-T1, -H1 / R410A : ISO-T1). Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB. *1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions. *2 : External static pressure is changeable to be set by the remote control. MAX external static pressure is "High static pressure" setting. The values of sound pressure level become 5dB(A) higher at external static pressure of 100Pa. *3 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down. *4 : The values are for one indoor unit operation. (Multi system only) *5 : In case of following conditions:Max.50m(Outdoor unit is higher & Outdoor temperature ≤ 43°C), Max.30m(Outdoor unit is higher & Outdoor temperature > 43°C)</p>

NOTES:

The data are measured under the following conditions(R32 : ISO-T1, -H1 / R410A : ISO-T1).
 Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
 *1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
 *2 : External static pressure is changeable to be set by the remote control. MAX external static pressure is "High static pressure" setting. The values of sound pressure level become 5dB(A) higher at external static pressure of 100Pa.
 *3 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
 *4 : The values are for one indoor unit operation. (Multi system only)

SRK Indoor Unit Wall Mounted

SRK 50•60
Only used with
Multi System.

SRK 71•100
Common to the
both case of
Single and Multi

Wireless LAN Built-in
SRK 71•100
Only connected to
R32 outdoor unit.

Wireless
remote control

Remote control (Option)

Wired

RC-EX3D

RC-E5

New!

RC-ES1

*Not all functions available with all remote control options.

Elegant Timeless Design

The SRK series air-conditioners have been innovatively designed with rounded contours that fit beautifully into any of Europe's diverse interior settings.

The design was created by the Italian industrial design studio Tensa srl, based in Milan, to respond to a broad spectrum of requirements. (SRK50-60)

Jet Air Technology

We used the same aerodynamic analysis technology as used in developing jet engines.

CFD (computational fluid dynamics), commonly used for precision jet engine blade design, has now transformed airconditioning.

Our cutting-edge indoor air distribution system ensures very quiet operation and unparalleled energy efficiency across diverse indoor spaces.

Fast → Slow

Colours in the figure show the air speed

Long Reach Air Flow

Long reach airflow is achieved by Jet technology. Good for large living rooms and shops, which increases comfort.

Flap Control System

The flap can swing within the range of upper and lower flap position selected.

* The wireless remote control is not applicable to the flap control system.

Indoor Unit Connection

Up to three indoor units are connectable to one outdoor unit.

* SC-BIKN2-E is necessary to connect to wired remote controller.

SC-BIKN2-E connection (Option)

Interface kit can be built into indoor unit. (SRK50-60)

* SC-BIKN2-E cannot be used simultaneously with the Wireless LAN control system

NOTES:

The data are measured under the following conditions (R32 : ISO-T1, -H1 / R410A : ISO-T1).

Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

*2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

NOTES:

The data are measured under the following conditions (R32 : ISO-T1, -H1 / R410A : ISO-T1).

Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

*2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

*3 : The values are for one indoor unit operation. (Multi system only)

*4 : In case of following conditions:Max.50m(Outdoor unit is higher & Outdoor temperature ≤ 43°C), Max.30m(Outdoor unit is higher & Outdoor temperature > 43°C)

FDE

Indoor Unit Ceiling Suspended

FDE 40/50/60/71/100/125/140

- Energy Saving
- Home Leave
- Hi Power
- Silent Operation
- Flap Control
- Favourite Setting

Remote control (Option)

Wired			Wireless
RC-EX3D	RC-E5	RC-ES1	RCN-E-E3

*Not all functions available with all remote control options.

High Efficiency

Energy efficiency was improved by use of DC fan motor & high efficient heat exchanger.

Lighter than ever

By decreasing the numbers of fan motors from two to one, we reduced the overall weight of our FDE units.

	Previous(VF)	Current(VH)	
60-71VH	37	33	4kg less!!
100-125-140VH	49	43	6kg less!!

Reduced Noise

The industry's lowest sound pressure levels were achieved by decreasing air flow volume, decreasing pressure loss with employment of one fan motor and optimizing casing and distributor shape.

Flap Control System

The flap can swing within the range of upper and lower flap position selected.

* The wireless remote control is not applicable to the flap control system.

Motion Sensor (Option)

Motion sensor is equipped in the panel and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

Improved Installation Workability

The refrigerant pipe from the unit can be arranged in three directions, rear, right and up. The drain pipe can be arranged in two directions, left and right. This will allow a free layout of piping for various installation conditions. The unit can only be serviced from the bottom.

Vertical height differences	Outdoor is higher/lower	m Max.30 / Max.15	Max.50 / Max.15		
Outdoor operating temperature range	Cooling	°CDB -15 to 50*2			
	Heating	°CWB -20 to 20			
Air filter, Q'ty	Pocket Plastic net x2(Washable)				
Remote control (option)	Wired:RC-EX3D, RC-E5, RC-ES1 Wireless:RCN-E-E3				

NOTES:

The data are measured under the following conditions(ISO-T1, -H1).
 Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
 *1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
 *2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

NOTES:

The data are measured under the following conditions(ISO-T1).

Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

*2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

Air filter, Q'ty			Pocket Plastic net x2(Washable)	
Remote control (option)			Wired:RC-EX3D, RC-E5, RC-ES1 Wireless:RCN-E-E3	

NOTES:

The data are measured under the following conditions(ISO-T1, -H1).

Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

*2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

NOTES:

The data are measured under the following conditions(R32 : ISO-T1, -H1 / R410A : ISO-T1).
 Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
 *1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
 *2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
 *3 : The values are for one indoor unit operation. (Multi system only)

FDF

Indoor Unit Floor Standing

FDF 71/100/125/140

*The remote control for the FDF-VD series will be RC-E5 type remote.

- Energy Saving
- Home Leave
- Hi Power
- Auto Swing
- Weekly Timer
- Favourite Setting

Remote control

*Not all functions available with all remote control options.

High Efficiency

Energy efficiency is improved by New heat exchanger design (In case of Hyper INV).

Improved operability and visibility

Equipped with wired remote control as standard equipment. Various functions can now be controlled. (VH series)

Wide and Powerful Air Flow

Equipped with a leak detector device

Can now be safely used with the new refrigerant detector that detects leakage of the refrigerant. (VH series)

Remote control will integrate leak detector functions:
Audible and visible alarm

Motion Sensor (Option)

Motion sensor is equipped in the ceiling plane or wall plane and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

Easy Transportation and Installation Workability

Piping and drain hose connection can be selected out of 6-directions and the selection makes installation workability more effective.

Due to slim design (Depth: 329mm, weight:49kg), easy transportation and installation are realized.

Easy Maintenance

The surface of heat exchanger can be appeared only removing the front panel. Easy cleaning of heat exchanger is possible.

NOTES:

The data are measured under the following conditions(R32 : ISO-T1, -H1 / R410A : ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

NOTES:

The data are measured under the following conditions(R32 : ISO-T1, -H1 / R410A : ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)
*4 : In case of following conditions:Max.50m(Outdoor unit is higher & Outdoor temperature ≤ 43°C), Max.30m(Outdoor unit is higher & Outdoor temperature > 43°C)

NOTES:

The data are measured under the following conditions(R32 : ISO-T1, -H1).

Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

*2 : If a cooling operation is conducted when the outdoor air temperature is -5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

Outdoor Unit Dimensions (Unit:mm)

SRC40ZSX-W1, 50ZSX-W3, 60ZSX-W3

Symbol	Content	
A	Service valve connection (Gas side)	φ 12.7(1/2") (Flare)
B	Service valve connection (Liquid side)	φ 6.35(1/4") (Flare)
C	Pipe/cable draw-out hole	
D	Drain discharge hole	φ 20×5 places
E	Anchor bolt hole	M10-12×4 places

Notes

- (1) The unit must not be surrounded by walls on the four sides.
- (2) The unit must be fixed with anchor bolts. An anchor bolt must not protrude more than 15mm.
- (3) If the unit is installed in the location where there is a possibility of strong winds, place the unit such that the direction of air from the outlet gets perpendicular to the wind direction.
- (4) Leave 200mm or more space above the unit.
- (5) The wall height on the outlet side should be 1200mm or less.
- (6) The model name label is attached on the front side of the unit.

Wired remote control

Option

RC-EX3D

Intuitive touch controller with Liquid Crystal Display

User friendly

- The industry's first LCD panel with light tap operation has been introduced
- Simple interface with only three buttons

H120 x W120 x D19 mm

Easy view

- Big LCD with 3.8 inch full dot display
- Back light function
- Multi-language display (9 languages)

Operation mode setting screen

The desired operation mode can be selected by simply tapping this button.

Setting temperature screen

To set your desired temperature, simply tap button.

High power operation

- The highest capacity operation (Max 15 minutes)
- Increasing compressor speed
 - Increasing air flow volume

Run / Stop

Energy-saving operation

- Changes set temperature. At 28°C in cooling mode and 22°C in heating mode, 25°C in auto mode.
- Adjustment of operation based on outdoor temperature.

Main functions

	Function name	Description
Economy & Timer	Energy-saving operation	Since the capacity is controlled automatically based on the outdoor temperature, energy can be saved without losing comfort.
	Sleep timer	Specify the start and stop time for the operation. The selectable range of setting time is from 30 to 240 minutes (at 10-minute intervals).
	Set temperature auto return	The temperature automatically returns to the previously set temperature.
	Set ON timer by hour	When the predetermined time is reached, the air-conditioner automatically turns on.
	Set OFF timer by hour	When the predetermined time is reached, the air-conditioner automatically turns off.
	Set ON timer by clock	The air-conditioner turns on at the set time.
	Set OFF timer by clock	The air-conditioner turns off at the set time.
	Weekly timer	On or Off timer can be set on a weekly basis.
	Peak-cut timer	Capacity control can be set by using peak cut function on RC-EX3D for better energy saving. Five-step capacity control is available.
	Home leave operation	When the unit is not used for a long period, the room temperature is maintained at a moderate level, avoiding extremely hot or cool temperatures.
Comfort	Big LCD & Touch screen panel	Large 3.8 inch screen has resulted in improved visibility and operability.
	Easy modification of individual flap control	User can visually confirm and set the direction of flap using the visual display on the remote control.
	Automatic fan speed *1	The micro-computer automatically adjusts the airflow effectively to follow the changes of return air temperature.
	Temp increment setting	Temperature increments for changes in the set temperature can be adjusted.
	Silent mode	Set the period of time to operate the Outdoor unit with prioritizing the quietness.

	Function name	Description
Convenience	Function switch *1	The function switch allows user to select and set two functions among available functions .
	Favourite setting *1	Operation mode, set temperature, fan speed and air flow direction automatically adjust to the programmed favourite setting.
	Adjusting Brightness of the operation lamp	The brightness of the background light can be adjusted by 10 stages.
	LCD contrast setting	This function allows user to adjust LCD display contrast.
	High power operation	High Power Mode increases the unit operating ability for 15 minutes to quickly adjust the room temperature to a comfortable level.
	Back light setting	This convenient function allows user to see controls under low light conditions.
	Administrator settings	This function only allows specific individuals to operate the unit.
	Setting temp range	Limited range of setting temperature in the heating or the cooling operation can be selected.
	External Input / Output Function	The external input/output of indoor unit by remote controller can set input/output based on user needs.
	Select the language	Set the language to be displayed on the remote control.
Service	USB connection (mini-B)	This function allows batch input of schedule timer settings and other settings involving a large amount of data.
	Error code display	This function allows user to check information displayed when abnormal function of the unit occurs.
	Operation data display	Displays various types of air-conditioner operation data in real time.
	Contact company display	Address of the service contact is displayed.
	Filter sign	Announces the due time for cleaning of the air filter.
	Static pressure adjustment	Allows user to adjust duct static pressure using the remote control.
	Backup Control	Allows for rotation control, fault backup control, and capacity backup control.

*1 Cannot be used when a centralized control remote is connected.

Wired remote control

option

RC-E5

H120 × W120 × D19 mm

- Weekly timer function as standard
- Timer operation
- Run hour meters to facilitate maintenance checking
- Room temperature controlled by the remote control sensor
- Adjustable set temperature ranges

The RC-E5 control enables extensive access to service and maintenance technical data combined with easy to use functions and a clear LCD display.

Stylish remote control

option

RC-ES1 (wired) **New!**

H86 × W86 × D17 mm

- Stylish and sophisticated design
- Compact size (86mm×86mm)
- Remote control with Bluetooth® wireless technology

reddot winner 2025

iF WINNER 2025 GOLD

Wireless connection

Remote control with Bluetooth® wireless technology.
 Easy set-up of indoor units.
 Notifications of abnormal conditions or operational data from the remote control will be sent to your smartphone.

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by MITSUBISHI HEAVY INDUSTRIES THERMAL SYSTEMS, LTD. is under license.

Wireless remote control

option

RCN-T-5BW-E2 RCN-T-5BB-E2

For wireless control simply insert the infrared receiver kit on a corner of the panel.

* Wireless remote control is not applicable to the Individual flap control system.

RCN-TC-5AW-E3

RCN-KIT4-E2

RCN-E-E3

Thermistor

option

SC-THB-E3

In case the sensor integrated in the indoor unit or in the remote controller is unable to sense the room temperature correctly, or an individual controller in each room is not required but a temperature sensor is (as when a central control system is in place), install SC-THB-E3 in an adequate location in the room.

Air Handling Unit Interface

AHU-KIT-SP2

The AHU controller will function as an interface between MHI's PAC outdoor units and locally produced heat exchanger for Air Handling Unit (AHU).

- Compact AHU interface for MHI's Split system
- Modbus connection
- 0-10V/4-20mA capacity control
- Cascade control
- Various external I/O
- Set temperature control

Main components

Main functions

Model	AHU-KIT-SP2	
Size	W290 x H109.5x D57mm	
External Input	Capacity control	○ 0-10V DC, 4-20mA(0-100%)
	Cooling / Heating	○
	Operation On/Off	○
	Emergency stop	○
External Output	Comp On/Off	○
	Run/Stop	○
	Defrost On/Off	○
	Error	○
Modbus (RS-485)	○	
Cascade connection	○ Max 16	
Standard	EN60335-1	

Compatibility PAC & RAC outdoor unit will be in scope.

Capacity	R32	R410A
Small	SRC40/50/60ZSX-W1,W3	—
	FDC71VNX-W	—
Medium	FDC100/125/140VNA-W	FDC100/125/140VNA
	FDC100/125/140VSA-W	FDC100/125/140VSA
	FDC100/125/140VNX-W	FDC100/125/140VNX
	FDC100/125/140VSX-W	FDC100/125/140VSX
Large	FDC200/250/280VSA-W	FDC200/250VSA

System Examples & Advantages

Ex1. General AHU

- 0-10V/4-20mA capacity control
- Various I/O for better control
- R/C can be removed

Compatible with market standard AHU controller.
Provide wide flexibility for AHU solution.

Ex2. Modbus AHU

- Modbus connection
- Same control as external I/O

BMS connectability without any extra device.

Ex3. Simple AHU

- Remote controller connection
- Adequate external input/output

Simple stand-alone AHU control by set temperature control from RC.

Ex4. Big capacity AHU

Cascade control provides wide range of AHU capacity with small footprint. Multiple outdoor unit increase system reliability and efficiency.

SUPERLINK-II

- Control Systems -

Central Control

SC-SL1N-E

Start/stop control of up to 16 indoor units is possible either individually or collectively. With simple operations, you can achieve centralized control.

SC-SL2NA-E

Centralized control of up to 64 indoor units. Including weekly timer function as standard.

SC-SL4-AE3, -BE3

Easy operation thanks to with a large colour LCD and touch panel. Up to 128 indoor units can be controlled, when SUPERLINK-II systems are connected.

Building Management Systems

Production by order

SC-WBGW256* WEB & BACnet Gateway

SC-WBGW256, up to 256 cells (some cells can have two or more indoor units and total number of indoor units can be up to 256 units) are controlled from the Internet Explorer and centrally from Building Management Systems.

Users can manage up to 1024 units by connecting the four devices !!

* Additional engineering service is required. Please consult your dealer when using these system.

SUPERLINK E BOARD (SC-ADNA-E)

This board is used when conducting control of the single package (wired remote control unit) 1-type series using a network option (SC-SL1N-E, SC-SL2NA-E, etc).

- (1) Functions**
- (a) Transmits the settings from the network option to the indoor units.
 - (b) Returns the priority indoor unit data in response to a data request from the network option.
 - (c) Inspects the error status of connected indoor units and transmits the inspection codes to the network option.
 - (d) A maximum of 16 units can be controlled (if in the same operation mode).

(2) Wiring connection diagram

(3) Metal box dimension (unit:mm)

Basic Connections

Plural Controls by Multiple Remote Controls. Mixture of Multiple Units

- Transmit the information of plural "Master" units to the network.
- Transmit the abnormalities of the "Slave" units to the network.
- ▶ Setting the plural "Master/Slave" units with the dip SW of the printed circuit board.
- ▶ Setting the "Master/Slave" remote controls with the dip SW of the remote control board.

Plural Controls by Multiple Remote Controls. Mixture of Multiple Units

Without Remote Control

Wireless Kit

External switch connection CNT, CNTA

All indoor units are equipped with an additional connection point CnT to connect indoor units to an external ON/OFF switch; e.g. time clock, fire alarm, etc.

Remote surveillance system

Card key on-off

Energy Efficient and Environmentally Conscious

Several radical design changes and engineering developments have brought about a vast improvement in energy efficiency and environmental protection.

ENERGY LABEL

SEER and SCOP is defined in European regulations listed below.

No.626/2011 of 4 May 2011:
energy labeling of air-conditioners
(below cooling capacity 12kW).

No.206/2012 of 6 March 2012:
requirement for air-conditioners and comfort fans.

Seasonal efficiency is the method of rating the true efficiency of heating and cooling products over an entire year.

Set by the EU's new regulation implementing Eco-Design Directive for Energy related Product (ErP) which specifies the minimum efficiency of air-conditioners manufacturers must integrate into their products.

The Seasonal Efficiency rating system that must be used for heating and cooling by all manufacturers are;

SEER - Seasonal Efficiency Ratio (value in cooling)
SCOP - Seasonal Coefficient of Performance (value in heating)

The new rating system will indicate the true efficiency of the energy using product at specified condition.

Employment of lead-free solder

Adapted to RoHS directive

RoHS:Restriction of Hazardous substances

In order to avoid the release of hazardous substances into the environment, all models have utilised lead-free solder application. It has been considered to be difficult to use lead-free solder for practical applications because it requires higher solder temperatures at assembly, which can jeopardize reliability. However our PbF soldering method can produce a higher quality lead-free printed circuit board.

Employment of R32 R410A

All models use refrigerant R32 or R410A characterized by the ozone depletion coefficient being 0.

Excellent Energy Saving

High performance and excellent energy savings are achieved at the same time by heat exchanger's increased capacity and employment of high efficiency DC motor.

• Refrigerant contained in the products is a fluorinated greenhouse gas listed in Regulation (EU) No 517/2014.
 • SEER/SCOP are based on EN14825.2016 and Commission regulation(EU) No.2016/2281. Temperature conditions for calculating SCOP are based on "Average climate".
 • 'tonne(s) of CO₂ equivalent' means a quantity of greenhouse gases- expressed as the product of the weight of the greenhouse gases in metric tonnes and of their global warming potential.

- Refrigerant contained in the products is a fluorinated greenhouse gas listed in Regulation (EU) No 517/2014.
- SEER/SCOP are based on EN14825.2016 and Commission regulation(EU) No.2016/2281. Temperature conditions for calculating SCOP are based on "Average climate".
- 'tonne(s) of CO₂ equivalent' means a quantity of greenhouse gases- expressed as the product of the weight of the greenhouse gases in metric tonnes and of their global warming potential.

SEER and SCOP is defined in European regulations listed below.

No.2016/2281: requirement for air-heating products, cooling products, high temperature process chillers and fan coil units. Seasonal efficiency is the new way of rating the true efficiency of heating and cooling products over an entire year.

Set by the EU's new regulation implementing Eco-Design Directive for Energy Related Product (ErP) which specifies the minimum efficiency of air-conditioners manufacturers must integrate into their products.

The new Seasonal Efficiency rating system that must be used for heating and cooling by all manufacturers are;

Before starting use

Heating performance

The heating performance values (kW) described in the catalogue are the values obtained by operating at an outdoor temperature of 7°C and indoor temperature of 20°C as set forth in the ISO Standards. Heating performance is reduced as the temperature drops. If the outdoor temperature is too low and the heating performance is insufficient, use other heating appliances as well.

Indication of sound values

The sound values are the values (A scale) measured in a chamber such as an anechoic chamber following the ISO Standards. In the actual installation state, the value is normally larger than the values given in the catalogue due to the effect of surrounding noise and echo. Take this into consideration when installing.

Use in oil atmosphere

Avoid installing this unit in an atmosphere where oil scatters or builds up, such as in a kitchen or machine factory. If the oil adheres to the heat exchanger, the heat exchanging performance will drop, mist may be generated, and the synthetic resin parts may deform and break.

Use in acidic or alkaline atmosphere

If this unit is used in acidic atmosphere such as hot spring areas having high level of sulfuric gases or in alkaline atmosphere including ammonia or calcium chloride, places where the exhaust of the heat exchanger is sucked in, or at coastal areas where the unit is subject to salt breezes, the outer plate or heat exchanger, etc., will corrode. Please ask a dealer or specialist when you use an air-conditioner in places differing from a general atmosphere.

Use in places with high ceilings

If the ceiling is high, install a circulator to improve the heat and air flow distribution when heating.

Refrigerant leakage

The refrigerant (R32, R410A) used for air-conditioner is non-toxic and in its original state. However, in consideration of a state where the refrigerant leaks into the room, measures against refrigerant leaks must be taken in small rooms where the tolerable level could be exceeded. Take measures by installing ventilation devices, etc.

Use in snowy areas

Take the following measures when installing the outdoor unit in snowy areas.

•Snow prevention

Install a snow-prevention hood so that the snow does not obstruct the air intake port or enter and freeze in the outdoor unit.

•Snow piling

In areas with heavy snow fall, the piled snow could block the air intake port. In this case, a frame that is 50cm or higher than the estimated snow fall must be installed underneath the outdoor unit.

Automatic defrosting device

If the temperature is low, and the humidity is high, frost will stick to the heat exchanger of the outdoor unit. If continued to use, the heating performance will drop.

The "Automatic defrosting device" will function to remove this frost. After heating for approx. three to ten minutes, it will stop, and the frost will be removed. After defrosting, hot air will be blown again.

Servicing

After the air-conditioner has been used for several seasons, dirt will build up in the air-conditioner causing the performance to drop. In addition to regular servicing, a maintenance contract by a specialist is recommended.

Safety Precautions

Air-conditioner usage target

The air-conditioner described in this catalogue is a dedicated cooling/heating device for human use. Do not use it for special applications such as the storage of food items, animals or plants, precision devices or valuable art, etc. This could cause the quality of the items to drop, etc. Do not use this for cooling vehicles or ships. Water leakage or current leaks could occur.

Before use

Always read the "User's Manual" thoroughly before starting use.

Installation

Always commission the installation to a dealer or specialist. Improper installation will lead to water leakage, electric shocks and fires. Make sure that the outdoor unit is stable in installation. Fix the unit to stable base.

Usage place

Do not install in places where combustible gas could leak or where there are sparks. Installation in a place where combustible gas could be generated, flow or accumulate, or places containing carbon fibers could lead to fires.

Certified ISO 9001

JQA-0709

Mitsubishi Heavy Industries - Mahajak Air Conditioners Co., Ltd. has been certified of Quality Management System in Accordance with ISO 9001 by TUV NORD (Thailand) Ltd.
