

MGS0450G / 60Hz

MGS0450G / 60Hz			DIMENSION (REFERENCE DATA)		
POWER RATING			Overall Dimensions	Length	
Continuous	450kW			Width	
Voltage Variation				Height	
Standard Voltage	3Phase 4 Wires, 480V		Total Weight (Dry)		
Voltages Available	3Phase 4 Wires, 380V, 400V, 416V, 440V and 460V		Total Weight (With Water & Oil)		
Note: Outputs for option	al voltages may differ from standard output mentioned				

Note: Outputs for optional voltages may differ from standard output mentioned above.

CONDITIONS & DEFINITIONS						
SYM	NAME OF	OVERLOAD OPERATION	DEFINITION	LOAD/OPERATING HOUR*		
	RATING		DEFINITION	AVE. LOAD FACTOR	AVE.LOAD	OPERATING
С	Continuous	Not allowed	Rating that can continuously generate power without limitation for operating hour per year under the required conditions for warranty in this document.	Maximum 100%	Maximum 100%	Unlimited

* Average load factor (per 24Hr or year) shall be calculated as per the formula in ISO 8528-1:2018 'average power output (Ppp)'.

GENERATOR SET OVERVIEW SPECIFICATION

This specification covers the indoor use MHIESA gas engine generator set and attached equipment.

	MGS MODEL	MGS0450G		
Generator Set				
	Frequency Hz		60	
	Voltage	V	480	
	Duty		Continuous	
	Rated Output	kVA	562.5kVA	
		kW	450kW	
	Gen. Eff. %		42.7	
	Hot water %		20.4	
	Exhaust heat %		20.3	
	Total Eff. %		83.4	
	NOx emmision at O ₂ =0% ppm		200	
	MODEL	GS6R2-PTK		
Engine	Speed (min ⁻¹)	1200		
	Output (kWm)	468.8		
		50%	57.8	
	Fuel Consumption m ³ N/h (% Load)	75%	80.9	
		100%	104	
	Lub. Oil Consumption (liter/h) 100% Load		0.174	
	Cooling System		Closed looped circuit by external radiator	

Generation efficiency is based on the following conditions as our standard. (1) Initial performance of the rated load

(2) Generator power factor : 0.9 or higher (lagging)

(3) Under standard atmospheric according to ISO 3046

(4) Tolerance: +5%

(5) Methane number: 80 or higher, fuel gas lower heating value: 36.47 MJ/m³

(6) Exhaust gas back pressure : 5.0kPa or lower

(7) Heat output from exhaust: exhaust cooling to 120° C

APPLICABLE STANDARD

Mitsubishi Heavy Industries Engine System Asia (MHIESA) gas generator set is designed in accordance with JIS, JEC, JEM, IEC, ISO and manufacturer's standards unless otherwise specified.

JIS : Japanese Industrial Standards

JEC : Japanese Electrotechnical Committee

JEM : The standard of Japanese Electrical Manufacturers Association

- IEC : International Electrotechnical Commission
- ISO : International Standard Organization

PAINTING

MITSUBISHI standard colour Munsell 6.0PB 4.4/5.2

ENVIRONMENT ETC.

MHIESA gas generator sets are designed to meet following operating conditions

Relative humidity : Max. 85%

Ambient Temperature : 5°C ~ 40°C

Altitude above sea level : <150m

GAS ENGINE

PARTICULARS OF GAS ENGINE

Engine model	GS6R2-PTK 4 cycle, water cooled, spark ignition pre-mixed fuel gas and air with exhaust turbine turbo charger and intake air cooler
No. of cylinder	6-L
Bore / stroke (mm)	170 / 220
Total displacement	30.0 liter
Frequency regulation	(100% load unloading or 30% loading) Transient 15% or below Steady State 5% or below Recovery Time 15 sec or below
Governor	Electronic air-fuel mixture control type
Fuel gas	Dry natural gas
Lubricating oil	Refer to Operation & Maintenance manual
Lubricating system	Forced lubricating by gear pump wet sump system
Lub. oil capacity	165 Liters (oil pan: 145Liters)
Lub. oil filter	Full flow paper element type
Lub. oil cooler	Jacket Water cooled corrugated type
Coolant	Refer to Operation & Maintenance manual
Water pump	Centrifugal type drive by AC motor Required water flow: Jacket water circuit : 39.6m ³ /h Intercooler circuit : 10.2m ³ /h Pressure loss in engine Jacket water circuit : 150kPa
	Intercooler circuit : 100kPa
Turbocharger	Exhaust gas turbine
Air cleaner	Paper element
Starting system	Electric starting Starter motor capacity : 7.5kW x 1 (DC24V)
Stopping system	de-energize to engine stop type solenoid valve on inlet of fuel gas pipe.

CONTROL & MONITORING SYSTEM

MHIESA gas generator set is standard equipped with an Engine Auxiliary Control Panel, a MHI developed Engine Control Panel (M-Agic), and a Remote Monitoring Panel. An optional Generator Control Panel allows customer easily integrate parallel operation function in their control system.

PARTICULARS OF AC GENERATOR

STANDARD SPECIFICATION

Brushless, self-excited, self-ventilated and rotating field
IP23
0.8 lagging
6 poles
Class H/F
Brushless
Single bearing

Mitsubishi Heavy Industries Engine System Asia Pte.Ltd. serves for the customers with improved products continually. Therefore specification and some materials will be changed without notice. The International System of units (SI) is used in this publication.
