

Quality Declaration

Management Philosophy

NTC contributes to the development of society by supporting the safe and stable operation of nuclear power plants through the operational technology services it provides to customers.

Quality Policy

NTC practices quality management based on the following policies in all business activities related to educating and training technical personnel in the field of nuclear power generation and assessing trainee complying with the standards that have been established for certification as a shift manager on nuclear power plant.

1. In addition to maintaining an awareness at all times of corporate social responsibility (CSR) as it relates to NTC's activities and the results of those activities, all personnel shall observe applicable laws and regulations as well as other social norms. (Emphasis on compliance)
2. NTC shall give utmost priority to nuclear safety. (Utmost priority of nuclear safety)
3. NTC shall strive to fulfill customers' requirements through quality activities and persistent improvement activities undertaken by participation of all of its employees. (Practice of persistent improvements and improvement of customers' satisfaction)

Measures

NTC shall set appropriate annual quality goals and objectives and formulate measures based on the above policies, taking into consideration effective utilization of resources and risk & opportunity-based thinking. NTC shall also follow up the state of achievement in a timely manner and take action to ensure steady progress toward achievement of them.

Adopted: April 1, 2006

Revised: June 15, 2018

Masaru Kusumoto, president
