

Environmental Declaration

Basic Philosophy

Based on the recognition that the conservation of the natural environment is a critical priority for all humankind, NTC is committed to aim to realize a sustainable society by bringing full employees' participation to reducing the environmental impact of its operations.

Policy

NTC shall make efforts to support safe and stable operation of nuclear power plants, to contribute to the social development and to reduce the environmental impact through operation technology service for its customers. And NTC shall strive to achieve harmony with the natural environment by practicing environmental management based on the policies described below.

1. In addition to maintaining an awareness at all times of the environmental effects of NTC's business activities and striving to prevent environmental pollution, all the personnel shall work on environmental improvement activities on an ongoing basis.
2. The following environmental effects of NTC's business activities have been identified as prior environmental management themes:
 - a. Reducing electric power consumption
 - b. Reducing water consumption
 - c. Reducing paper consumption
3. In addition to disseminating this Environmental Declaration within NTC so that every employee can strive actively to reduce the environmental impact of the company's operations, NTC shall make it open to the public.
4. NTC shall participate actively in environmental improvement of local activities.

NTC shall set goals and pursue environmental improvement activities in order to achieve the policy above.

Adopted: October 1, 2004

Revised: June 15, 2018

Masaru kusumoto, President
Nuclear Power Training Center, Ltd.
